Zendu Tracker

Next Generation Asset Trackers

Integration-Ready and Globally Scalable
Asset Tracking Solutions

OVERVIEW

Managing a multitude of assets and equipment is a tall task for organizations that operate across the globe. Next-generation advanced asset trackers can help such businesses to seamlessly connect with their asset infrastructure and ensure proper productivity and max-utilization from each asset.

ZenduTrackers is ZenduIT's next-generation asset management solutions portfolio that helps organizations capture more actionable real-time insights on driver behavior, geofencing, temperature monitoring, and much more. This enables organizations to improve their asset visibility and utilization and make informed decisions to ensuring compliance across their operations.

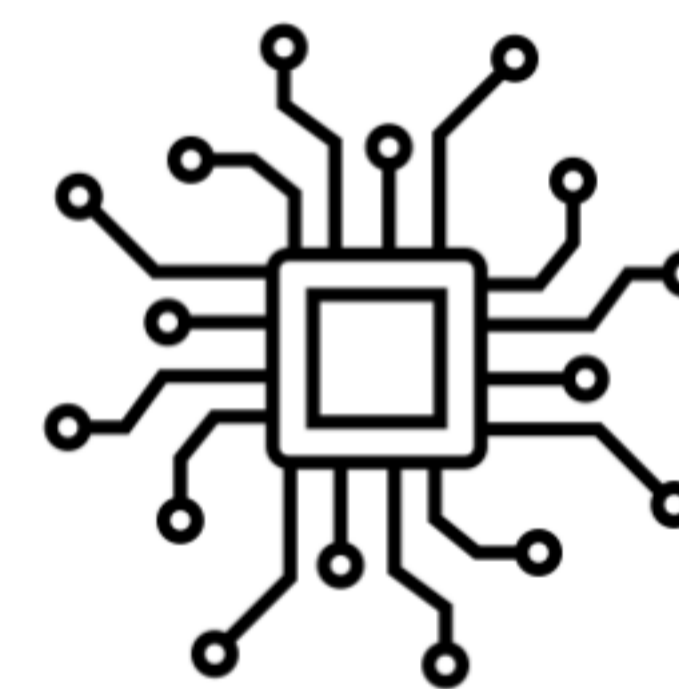

REAL TIME AND BUFFER LOCATIONS

Real time location update and buffer if out of network coverage

EASY INSTALLATION DESIGN

Installation with magnets, screws, polyurethane or heavy-duty tape

BLE 5.0 FOR SENSORS

Compatible with wide variety of BLE Sensors)

AUTOMATED REMOVAL AND DISCONNECTION ALERTS

Alerts sent when device is pulled off or disconnected

FEATURE HIGHLIGHTS

ZenduTracker TL P1-LF

ZenduTracker TL P1-LF is our cutting-edge asset tracker for all your tracking and monitoring needs. With a fixed reporting interval, rugged construction, and an IP67 waterproof rating, it's designed for durability and reliability. The non-rechargeable 8100 mAh battery ensures extended operational life, while removal alerts enhance security. Enjoy hassle-free installation with versatile mounting options. With advanced asset tracking capabilities, it ensures efficient and effective asset management solutions for all your business needs.

ZenduTracker TL W212BL

The next-generation ZenduTracker TL W212BL is an all-in-one model to serve your needs for a customized solution. The ultra-low power design enables longer operational cycles and ensures uninterrupted productivity. The tracker has multiple I/Os that could be used for ignition detection, relay, buzzer, SOS button, analog fuel sensors, or custom accessories. Advanced BLE 5.0 sensors capabilities allow seamless monitoring of temperature, humidity, door status, and so on.

FEATURE HIGHLIGHTS

ZenduTracker TL P2 Solar

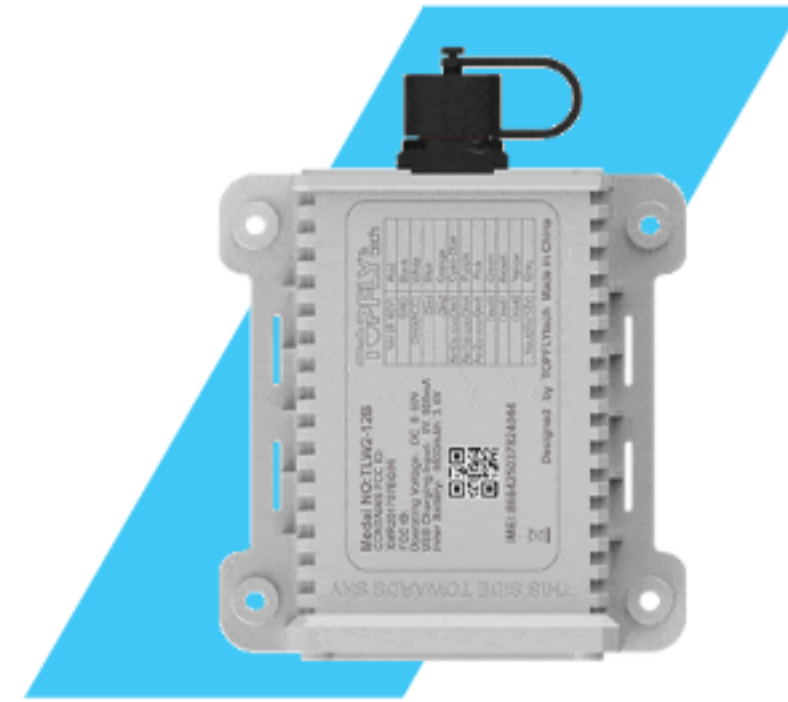

Transform your tracking operations with the ultra-tough and flexible **ZenduTracker TL P2 Solar**. The asset tracker comes built-in with BLE 5.0 capabilities that allow seamless connectivity with a wide variety of sensor infrastructure for full-proof asset management and monitoring. Equipped with rugged construction and IP67 waterproof features, it is designed to work both outdoors and indoors. **ZenduTracker TL P2 Solar** also provides users with real-time alerts for events such as start moving, stop moving, device removal, and so on.

ZenduTracker TL W212B

Track and manage your high-value assets with the powerful **ZenduTracker TL W212B**. Equipped with a large internal battery backup and low-power design, the next-generation tracker can operate for 20 days without charging. It is also exceptionally tough and weatherproof with IP67 proofing, enabling it to be used across indoor and outdoor applications. The asset tracker comes built-in with BLE 5.0 capabilities and multiple configurable I/Os that allow seamless connectivity with sensor infrastructure and real-time monitoring of temperature, humidity, door status, and so on.
